

Partner with CAP Group

Build sustainable growth with a Sri Lankan corporate group focused on agriculture, beverage innovation, manufacturing, exports, sustainability, and global partnerships.

www.cap.lk

CAP Ceylon™ is a Sri Lankan food and beverage enterprise dedicated to converting the abundance of our island's natural assets into innovative, premium products for customers both within Sri Lanka and internationally.

Our process starts at the farm and extends through ethical sourcing, product innovation, manufacturing, and ultimately to the bottle — establishing a true Farm-to-Bottle link between Sri Lankan agriculture and its consumers. Central to CAP is a deep passion for nature, creativity, and value generation. We recognize Sri Lanka's exceptional agricultural potential, and our goal is to convert more of this natural wealth into globally significant, value-added offerings. Our main priority lies in developing and expanding our own brands, crafting products that embody Sri Lankan quality, authenticity, and innovation on the world stage.

OUR VISION

To build a globally recognized Sri Lankan food and beverage enterprise by transforming the country's natural and agricultural resources into innovative, sustainable and high-value products for the world.

OUR MISSION

To connect Sri Lankan agriculture with consumers around the world through quality products, responsible sourcing, continuous innovation and sustainable value creation.

OUR VALUES

Nature First

Respecting the resources that make our products possible.

Quality

Maintaining high standards from farm to finished product.

Innovation

Creating products that respond to evolving consumer needs.

Integrity

Building relationships through trust, transparency and responsibility.

Empowerment

Creating meaningful opportunities for farmers, women and rural communities.

Sustainability

Growing our business while creating lasting value for people and the planet.

GROWING TOGETHER WITH OUR FARMERS

Our **Farm-to-Bottle** philosophy begins with the people who cultivate the ingredients behind our products. CAP works directly with farming communities and farmer clusters across Sri Lanka, helping create stronger connections between farmers, agriculture, processing and markets.

Today, our farmer network is connected with cultivation covering more than 1,000 acres across the island, creating a foundation for a more sustainable and traceable agricultural value chain.

Rather than viewing farmers simply as suppliers, we believe they are partners in our journey.

Through our farmer development initiatives, we work towards creating better opportunities for rural communities, encouraging sustainable cultivation and supporting the production of quality agricultural raw materials.

WOMEN FARMER EMPOWERMENT

Empowering women in agriculture is an important part of our commitment to inclusive rural development.

Through our women farmer empowerment initiatives, CAP aims to create opportunities for women to participate more actively in agricultural value creation and build stronger economic independence within their communities.

We believe that when farmers grow, communities grow — and when communities grow, the entire value chain becomes stronger.

OUR FARM-TO-BOTTLE APPROACH

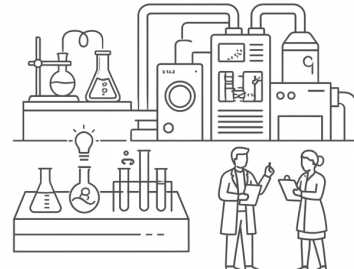

FARM → ↓ CONNECT → ↓ CREATE → ↓ BOTTLE → ↓ WORLD

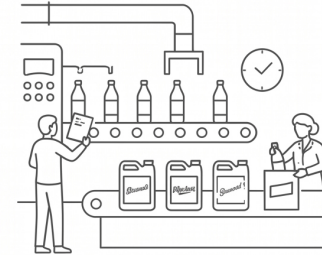

Working with farmer communities and sourcing quality agricultural ingredients.

Building long-term relationships between farmers, communities and our business.

Transforming natural ingredients through innovation, processing and product development.

Delivering carefully developed products to consumers through our brands.

Taking the goodness of Sri Lankan agriculture to local and international markets.

OUR BELIEF

Sri Lanka should not only export its agricultural resources — we should create more value from them and take that value to the world.

That belief is at the core of **CAP Ceylon™**.

TURNING NATURE INTO **GREAT PRODUCTS**

CAP combines Sri Lankan agricultural resources with food and beverage innovation, manufacturing expertise and an international market perspective.

Our focus is on developing and growing our own brands, creating products that consumers can connect with and trust.

From concept and formulation to manufacturing, packaging and market development, we continue to strengthen our capabilities across the value chain.

OUR MANUFACTURING **CAPABILITIES**

Our manufacturing platform supports a range of food and beverage products and is built around:

- Quality and food safety
- Product consistency
- Innovation and R&D
- Responsible sourcing
- Scalable production
- Export-oriented manufacturing

PARTNERING BEYOND **OUR OWN BRANDS**

While our primary focus is building our own brands, CAP also has the capability to work with selected business partners through:

OEM Manufacturing

Manufacturing products according to customer specifications.

ODM Product Development

Supporting customers in developing products from concept to commercial production.

Embrace the Vibrant Essence of Pure, Organic Tropical Fruit Purées

CAP Puree brings the authentic taste of Sri Lanka's tropical fruits to global markets through premium, organic fruit purées. Made from carefully selected fruits, our range includes soursop, wood apple, passion fruit, pineapple and coconut water. Using advanced aseptic processing, CAP Puree offers convenient bulk packing solutions from 5 kg to 200 kg, ideal for beverage, food and industrial applications.

CINNAMON OASIS

Cinnamon

Anti-diabetic activity

Comparatively less glucose level

Antioxidant activity

Great wines indeed tell a story, and ours begins with the essence of tropical organic pineapples, carefully selected and infused with pure Ceylon Cinnamon, renowned as the world's finest and most luxurious spice.

CAP Winery is a subsidiary of CAP Group and was formed with the intention of being Sri Lanka's leading manufacturer of exotic tropical wines. Our range of wines consist of the following:

01| Pineapple & Cinnamon Wine

02| Soursop White Wine

03| Soursop Herbal

When one travels to Europe, one consumes the country's food with the country's wine. We want to bring that concept to Sri Lanka where one will consume Sri Lankan food with Sri Lankan Wine.

Our story begins in the plantations of Thanamalwila where we teach and guide our farmers to grow our signature fruit, the soursop. Once the soursop is harvested, CAP Winery purchases these fruits as part of a buy back contract farming model and utilises them in our manufacturing facility. Through our contract farming model as well as our training programmes, we intend to give back to the community that serves us in further developing our business.

Whilst collaborating with the Sabaragamuwa University of Sri Lanka, CAP Winery had to undergo extensive research and development endeavours to create the tropical fruit wines. Following years of hard work, we were able to achieve successful research outcomes. We are glad that we are now one of the first companies in Sri Lanka to have a manufacturing and trading license for tropical fruit wine production.

Our mission is to develop Sri Lanka's image as a location not only for fine food but for fine wine. The time has come for us to take our wine out to the world. Through this endeavour, we hope to develop successful relationships and partnerships with your organisations for years to come. Let us continue this journey together.

BOTANICAL BLEND

Herbal

Anti-diabetic activity

Comparatively less glucose level

Antioxidant activity

Great wines indeed tell a story, and ours begins with the essence of organic soursop fruit, carefully selected and infused with a curated selection of ten natural botanical herbs sourced from the tropical island of Ceylon.

BLANC DE GRAVIOLA

Soursop

Anti-diabetic activity

Comparatively less glucose level

Antioxidant activity

Great wines indeed tell a story, and ours begins with the essence of organic soursop fruit sourced from the tropical island paradise of Ceylon. Meticulously selected, crafted to perfection, and matured in oak barrels.

Surprising Health Benefits of the Graviola

It is a Superfruit

Graviola (*Annona muricata*), also known as Soursop, is a small evergreen tree with many bioactive compounds, that is native to the Amazon Rainforest and other tropical areas of the Americas. It produces a large, heart-shaped edible fruit which is yellow-green colour, with white flesh.

In Brazil, the juice is a popular drink known as Guanábana. Although it's only recently become popular in the West, Graviola has a long history in ancient herbal remedies and treatments, with the leaf, stem, root, bark and seed all used traditionally. Since ancient times, it has become known that Graviola is rich in vitamins and minerals, all of which contribute to the health benefits it provides:

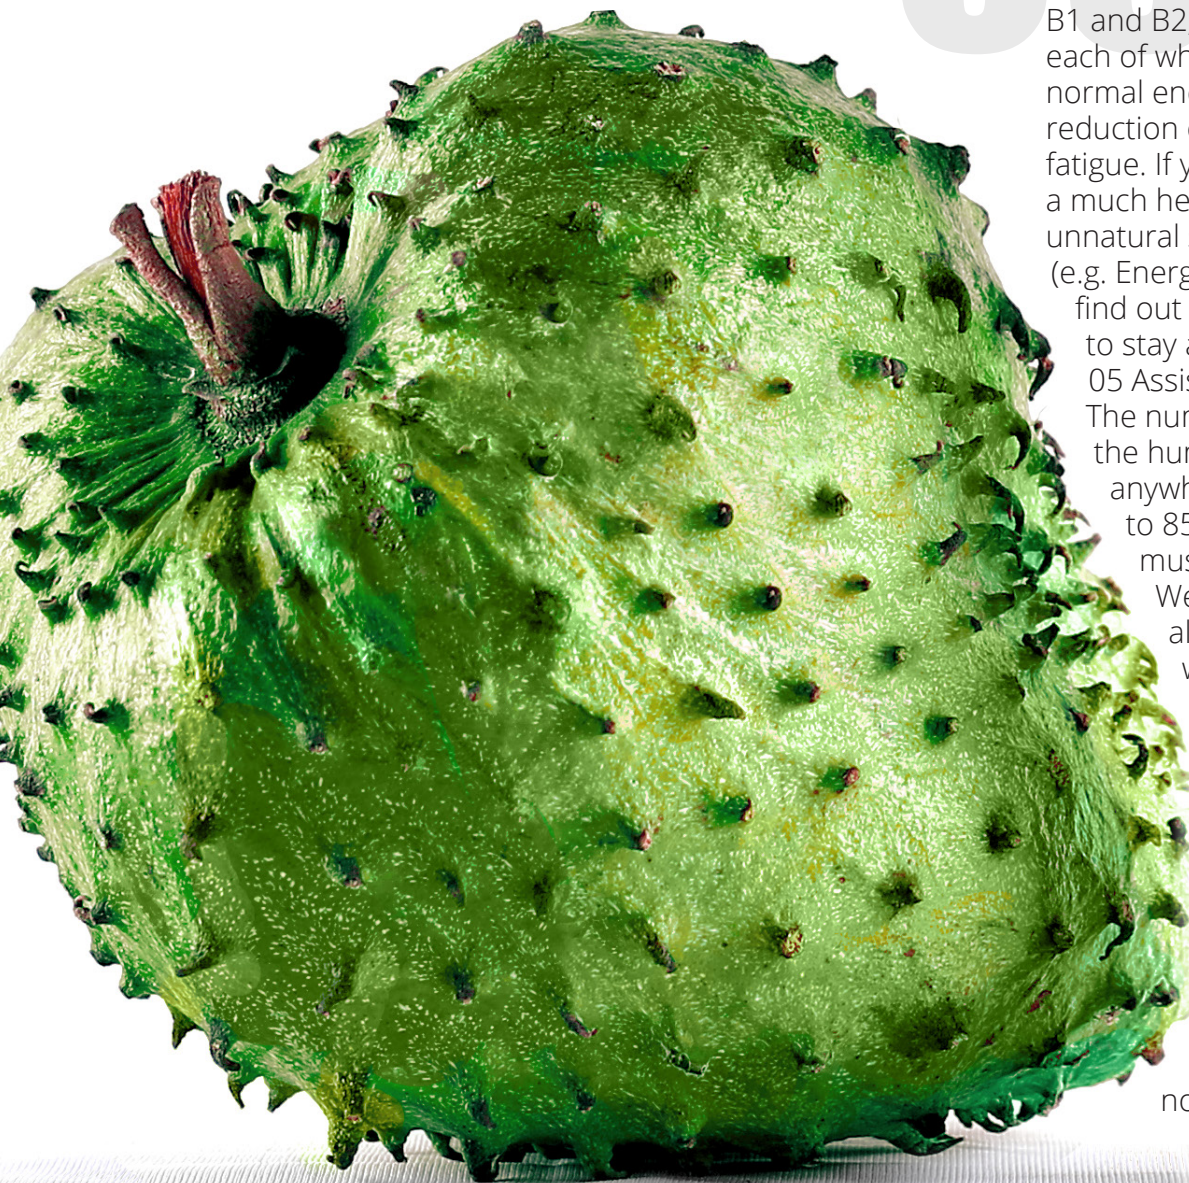

01 Source of antioxidants

Not only does Graviola contain a bounty of vitamins and minerals, but the stem, bark and leaves are rich in antioxidants, which help the body fight against free radical damage to cells.

02 May regulate blood glucose

Certain ingredients in Graviola include phytochemicals, which may help to regulate blood glucose levels and prevent spikes. Maintaining a healthy blood sugar level is important because it can help protect the vessels that supply blood to important organs, such as the heart.

Contributes to energy levels

Graviola contains Vitamins B1 and B2, and Magnesium, each of which contributes to normal energy levels and the reduction of tiredness and fatigue. If you're flagging, they're a much healthier alternative to unnatural sources of caffeine (e.g. Energy drinks). You can find out more about how to stay alert naturally here.

05 Assists muscle function
The number of muscles in the human body can range anywhere between 640 to 850 - that's a lot of muscles to support!

We use our muscles all the time, even when we don't know it, so making sure they have the support they need is essential. Graviola contains Potassium and Calcium, both of which contribute to the maintenance of normal muscle function

Helps support the immune system

A healthy immune system is essential for helping the body to fight any nasties and keep illnesses at bay. Vitamin B1 and Zinc (both of which can be found in Graviola) can give the immune system a helping hand. Graviola leaf is said to be high in antioxidants.

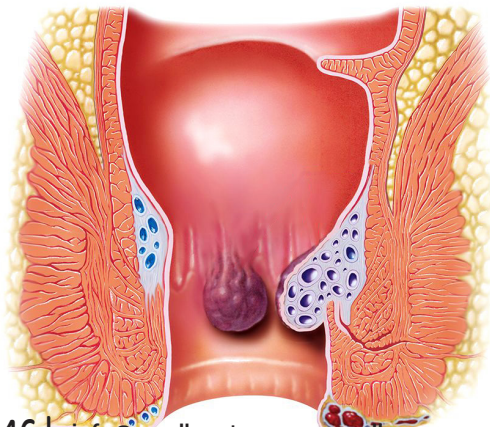

Assists muscle function

The number of muscles in the human body can range anywhere between 640 to 850 - that's a lot of muscles to support! We use our muscles all the time, even when we don't know it, so making sure they have the support they need is essential. Graviola contains Potassium and Calcium, both of which contribute to the maintenance of normal muscle function.

Why Graviola

BENEFICIAL FOR HEART AND PREVENTS NERVE DAMAGE

Vitamin B1 in soursop accelerates metabolism, blood circulation and prevents nervous disorders. It also contains vitamin B2, which is vital for the body's energy production, fat storage, the functioning of the nervous system and maintenance of heart muscle.

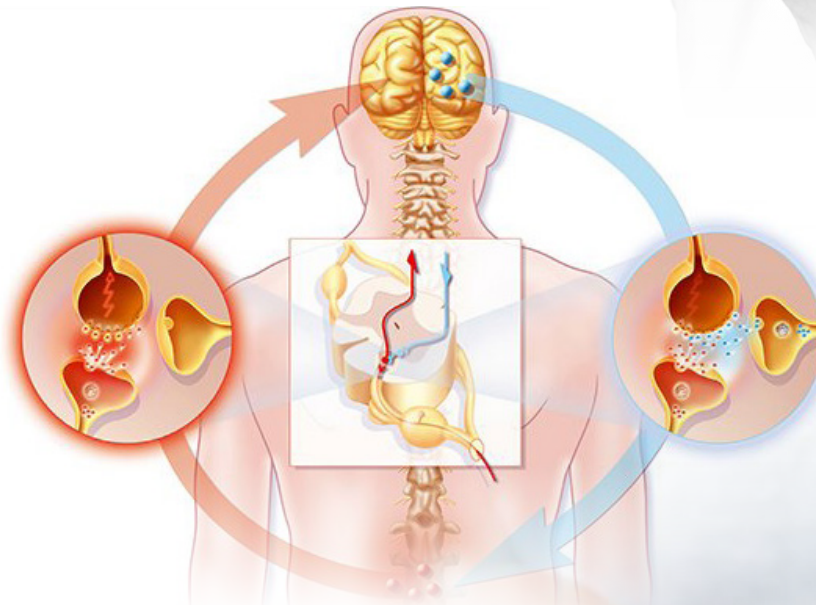

TREATMENT OF HEMORRHOID AND INFANT DIARRHEA

Soursop is effective in curing hemorrhoids. For this purpose, squeeze the fruit to take out at least one glass of water and drink it twice a day in the morning and afternoon for relief. In the case of infant diarrhea, 2-3 tablespoons of this water should be given to infants.

NATURAL CURE FOR ARTHRITIS AND RHEUMATISM

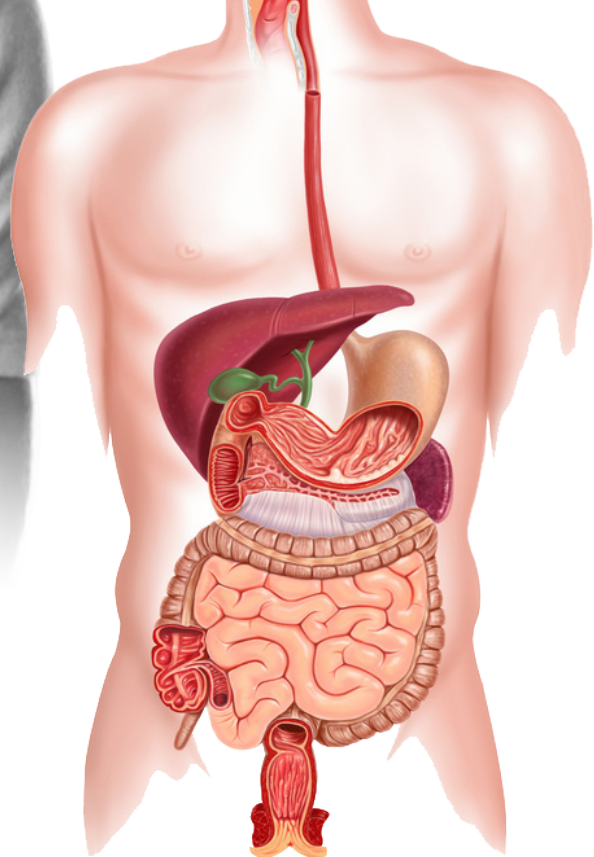

The topical application of this infusion is known to ease the pain and inflammation experienced due to arthritis and rheumatism. You can dip a clean cloth in warm tea and apply it on to the affected area, twice a day, to enjoy better relief..

TREATMENT OF FEVER

Tea made from soursop helps to lower the body temperature. In Africa, children were often bathed in Soursop leaves to cure fever.

RELIEVES CONSTIPATION

Since the fruit is rich in soluble and insoluble fibers it relieves constipation by adding bulk to stool and facilitating its easy elimination from the body

GOOD FOR YOUR LIVER

The tea made from soursoap leaves is known to be a liver tonic. Along with losing the liver disorders, it also shields the liver. It is also ideal to treat diseases affecting the gallbladder, including gallstones

NATURAL DIURETIC

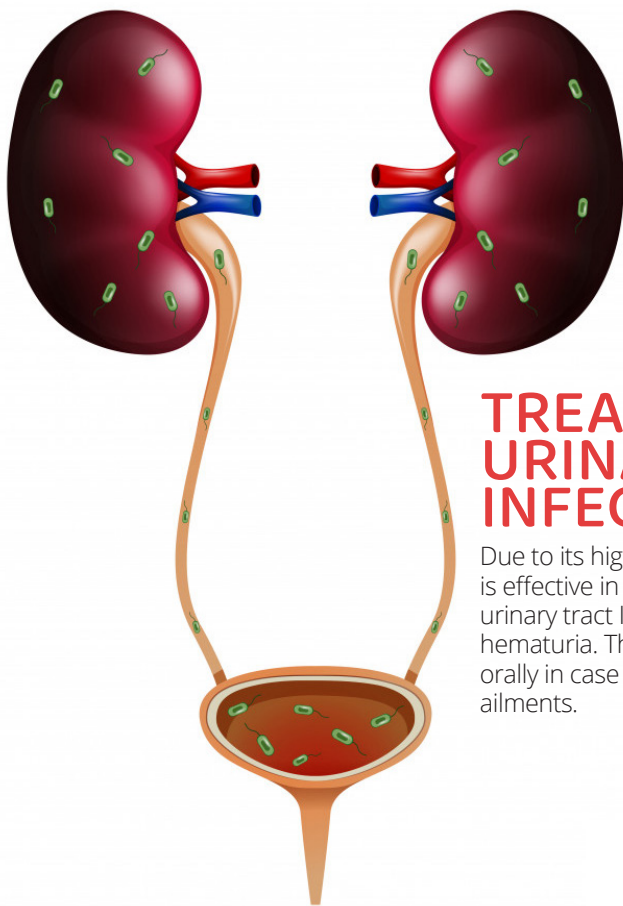

The flesh of this fruit is nearly 84% water which hydrates your body. It acts as a natural diuretic to treat edema or retention of water

PROMOTES SLEEP

Soursoap fruit contains a chemical called tryptophan, which promotes sleepiness and relaxation. It is thus, beneficial for insomniacs. Soursoap leaves are often used in aromatherapy and infusions for sleep. Soursoap fruit helps in controlling blood pressure and hypertension.

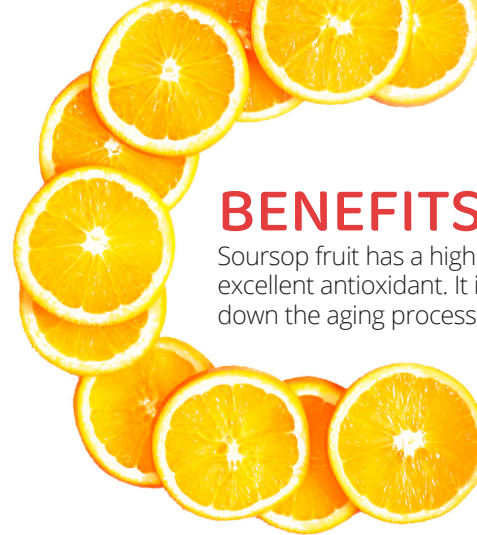

TREATMENT OF URINARY TRACT INFECTIONS

Due to its high moisture content soursop is effective in treating and preventing urinary tract Infections (UTI), urethritis and hematuria. The juice of the fruit can be taken orally in case of urethritis, hematuria and liver ailments.

RELIEVES PAIN

The leaves of the soursop plant are believed to have analgesic properties that can relieve pain. These leaves are often chewed or applied to open wounds. Their juice is effective in healing the wound while relieving pain from an injury. In case of excess pain, boil 20 soursop leaves in 5 cups of water to 3 cups are left and drink 3/4 cup of this concoction once in a day for relief.

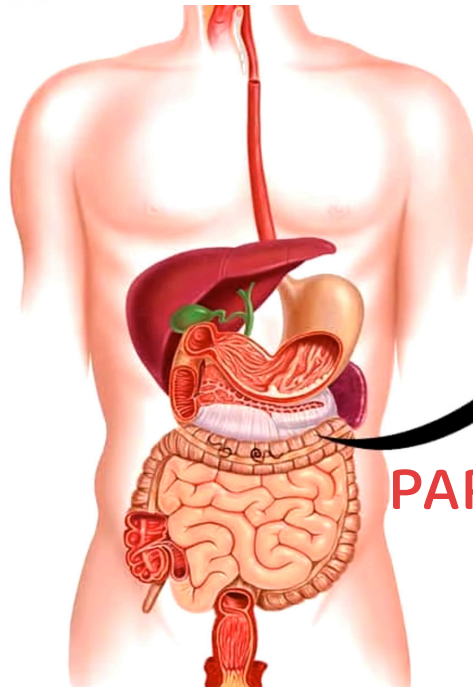

BENEFITS OF VITAMIN C

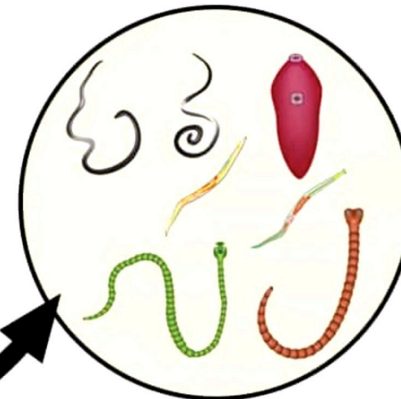

Soursop fruit has a high content of vitamin C which is an excellent antioxidant. It increases endurance and slows down the aging process.

FIGHTS FREE RADICALS

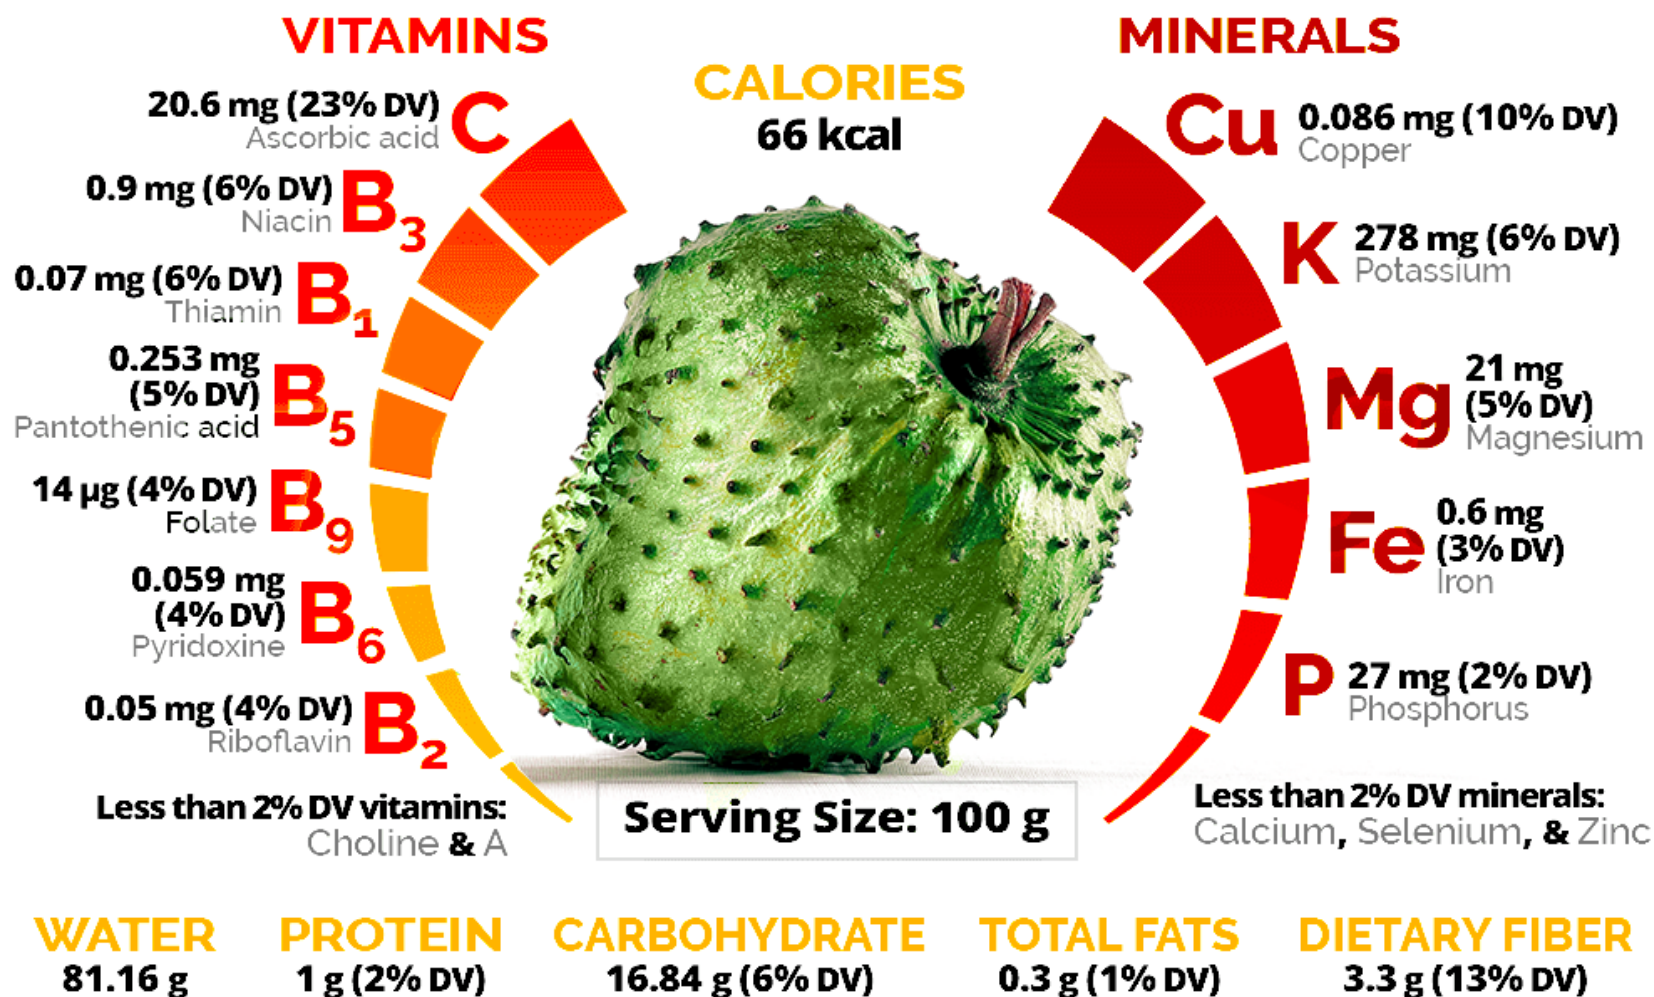

The ascorbic acid in soursop fruit increases the number of antioxidants in the body which play an important role in fighting the free radicals, thereby keeping several infections and disorders at bay.

KILLS PARASITES INSIDE

The Body Soursop is loaded with nutrients that are vital for the overall development of the body. The nutrients amino Acids, ascorbic acid, calcium, carbohydrates, phosphorus, thiamine, fibers, and riboflavin can inhibit parasites inside the body.

HEALTH BENEFITS OF SOURSOP

01 Diabetes

Drinking tea made from soursop can help lactating mothers to produce more milk. The hypoglycemic properties of the soursop can help regulate the level of blood sugar of a diabetic person. There are no side effects of drinking the soursop.

02 High Blood Pressure

The hypotensive properties found in the soursop are said to be an effective natural alternative for people suffering from hypertension.

03 Milk Production

Drinking tea made from soursop can help lactating mothers to produce more milk.

more details

04 Antimicrobial Properties

Scientific studies show that soursop has the following antimicrobial properties:

Antimalarial	Antipruritic
Antiviruses	Antibacterial

05 Bone Health

Soursop leaves contain at least 25 percent calcium, which plays an integral part in keeping the bones strong and healthy

06 Energy Booster

Thiamine can be found in soursop. This essential vitamin converts the sugar in the human body into energy.

07 Herpes

People suffering from herpes should drink soursop leaves tea in order to prevent outbreaks.

08 Stress Reliever

Just like chocolates and other sugary foods, soursop can fix a woebegone mood.

09 Nerves

Tension nerves can appear anytime. So in order to keep the nerves, calm drinking soursop can be the immediate and natural solution

10

Muscle Cramps

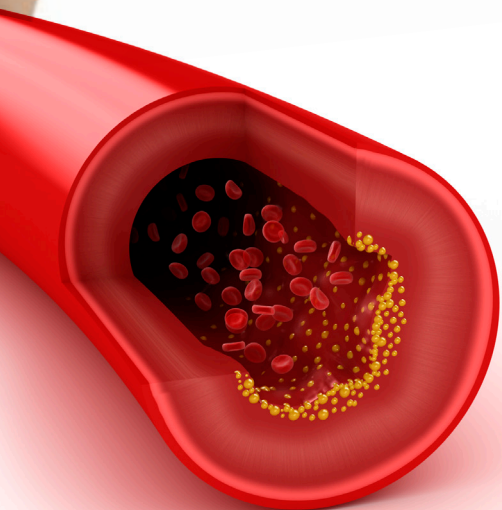

Soursop has potassium, which prevents the development of the muscle cramps.

11

Constipation

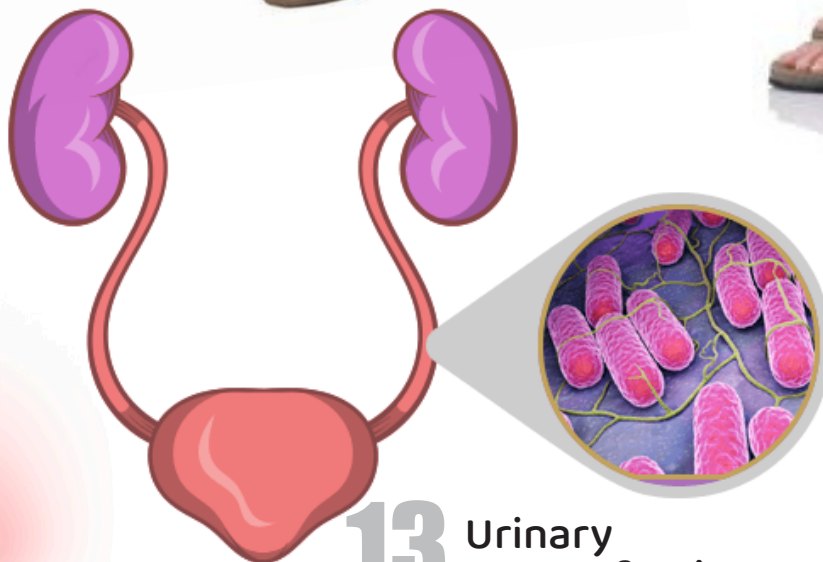

Fiber is present in every soursop drinking tea made from soursop leaves that can address this digestive problem.

12

Cholesterol Count

The niacin found in the soursop can help regulate the bad cholesterol, as well as boosting the good cholesterol.

13

Urinary Tract Infection

According to scientific research, vitamin C stops the accumulation of bacteria in the urinary tract of the human body. Thus, preventing the development of an infection. The soursop contains vitamin C.

14

Anemia

A great amount of iron can be found in soursop leaves. In case you are not aware, lack of iron in the human body is the primary reason for anemia.

15

Pregnancy

The folate, a B vitamin, helps a pregnant woman away from developing any deficiency. Soursop contains folate.

20

Anticarcinogenic Properties

According to the Journal of Natural Products, the soursop fruits & leaves are considered 10,000 times more effective than the Adriamycin, a drug used in chemotherapy.

16

Migraine

The excruciating pain brought by a migraine is so annoying. The riboflavin present in soursop leaves can address this problem.

19

Doresopathy

Back pain can be lessened when drinking soursop leaf tea & fruit juice.

18

Immune System Booster

In order to improve the function of the immune system, drinking soursop leaves tea & fruit juice can be a great idea. Researchers have found that soursop leaf tea can help contribute to fat loss by increasing the body's metabolism.

17

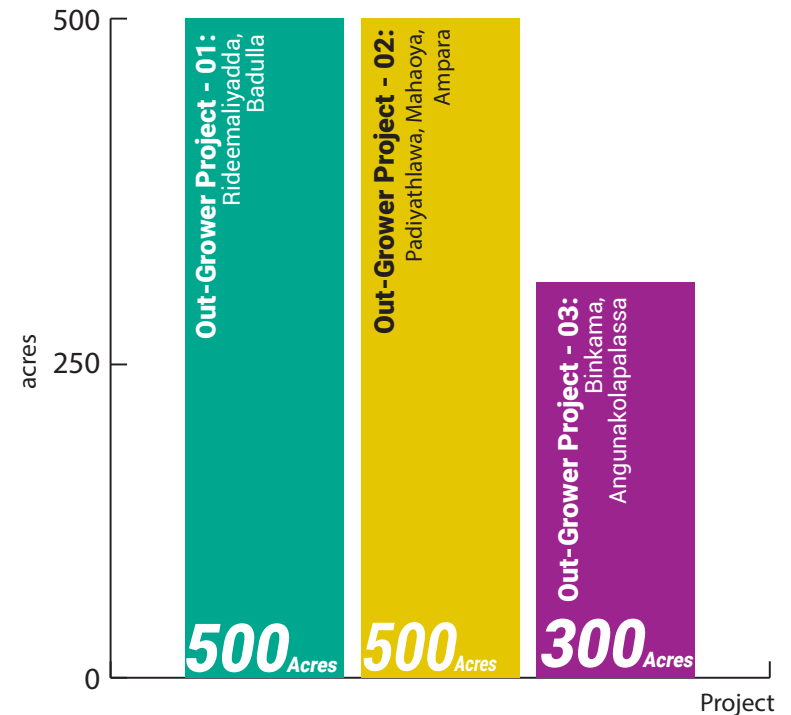

Rheumatoid Arthritis

The painful sensation throughout the body caused by rheumatoid arthritis can be relieved by using soursop.

Out-Grower Project

(with World Bank)

We have started two projects with MOA (The Ministry of Agriculture) & World Bank Programme as a business the promotor Social and Economic Development priority is paramount in the people of Monaragala district. The women population has recorded around 49% of the total population of the district. By considering the above situation, CAP Green Forest Private Limited has kept the initial step to uplift 1,000 women Farmers in Monaragala with the support of the CAP Farmer Foundation and later to increase up to 3000. Women Farmer the Monaragala Association (WFMA) was established in May 2017 and the organization is located in the area of Monaragala district of Sri Lanka. WFMA believes rural minority women have often been neglected in terms of social and economic development and the lack of resources has stagnated rural development. WFMA is the first woman owned and operated association in the area of Monaragala that aiming women's social and economic development through cultivation.

i) How We Support Them – Out Grower by back system

As per the proposed system, the social and economic wellbeing of the selected women are expected to uplift. The selected women farmers are given technical knowledge, training and Support. Then we supply Plants materials. Their Responsibility to plant and care until harvesting and by buy back by from us with a guaranteed price. Also, this is not a full-time job that they need to engage while taking harvesting then can take another regular income with other intercrops or work as a paid farmer in our largescale land when we needed.

ii) Vision and Mission

“Economic Empowerment and eliminate poverty by increasing the Women’s income and wellbeing through, regional grown Fruits & vegetables while expanding income opportunities “

iii) Objectives/goals

- We strive to meet the needs of a growing population, to protect and preserve their farms, to help improve their lives while making agriculture more viable and rewarding
- To produce natural and environmentally friendly products
- To promote high nutritious and medical value added agricultural products
- Creating a profitable market for the products

- To extend and contribute technical knowledge to farmers and upgrade their agricultural practices
- To strengthen the productive capacity of the women members.
- To create a sense of awareness for the women folk towards sustainable agriculture production
- To corporate between our small business units (CAP Green Forest, Farmers Foundation, WMEC) which can lead to the best image in the mind of stakeholders as farmers, community, employees, shareholders and government in the long term.

with purchasing all-natural products with better value for nutrition and overall health. "I want to spread awareness of how unhealthy the popular beverages we have in the local market are and provide a better alternative. Other countries have realised the value of a healthy food culture and have already taken steps to promote food and beverages that are healthier. We must also have a programme in place to build healthier future generation."

Business strong amidst COVID-19

Although many businesses have struggled due to the ongoing Coronavirus pandemic, business has been going strong for Ranjan. "We are fortunate to be supported by the
